

QUICK GUIDE Clever Access 2.0

The following guide details the process to restore the Database.

Database Restoration:

Once the software is installed and with your CD KEY registered, it will be possible to restore the previously backed up database.

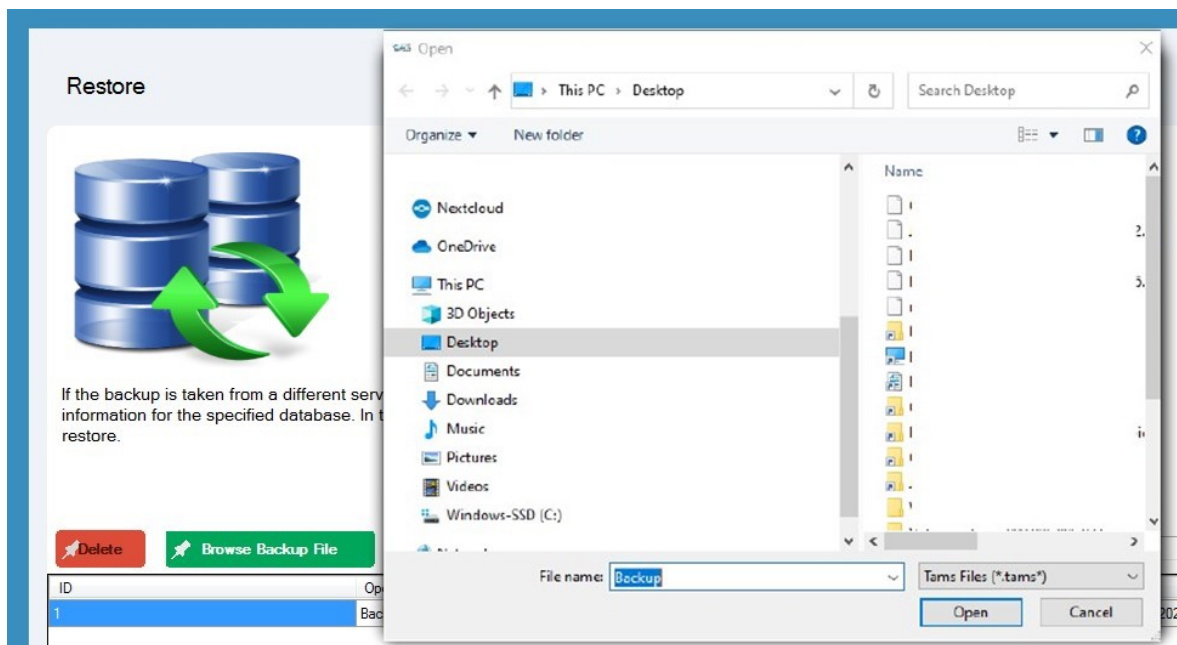

- 1.- Go to "Tools" / "Restore"
- 2.- Click on "Search File"

The screenshot displays the Clever Access 2.0 web application interface. On the left, a dark sidebar menu contains various options, with 'Restore' highlighted in blue. The main content area is titled 'Restore' and features a graphic of database cylinders with green arrows indicating a restore process. A large blue 'Restore' button is positioned to the right of the graphic. Below the graphic, a text block explains that if a backup is taken from a different server, the destination server will not have the backup history information. Two buttons, 'Delete' and 'Browse Backup File', are located below the text, with 'Browse Backup File' highlighted by a red rectangular box. At the bottom of the interface, a table displays backup history information.

ID	Operation	PerformDateTime
1	BackUp	2020-09-07 20:16:33

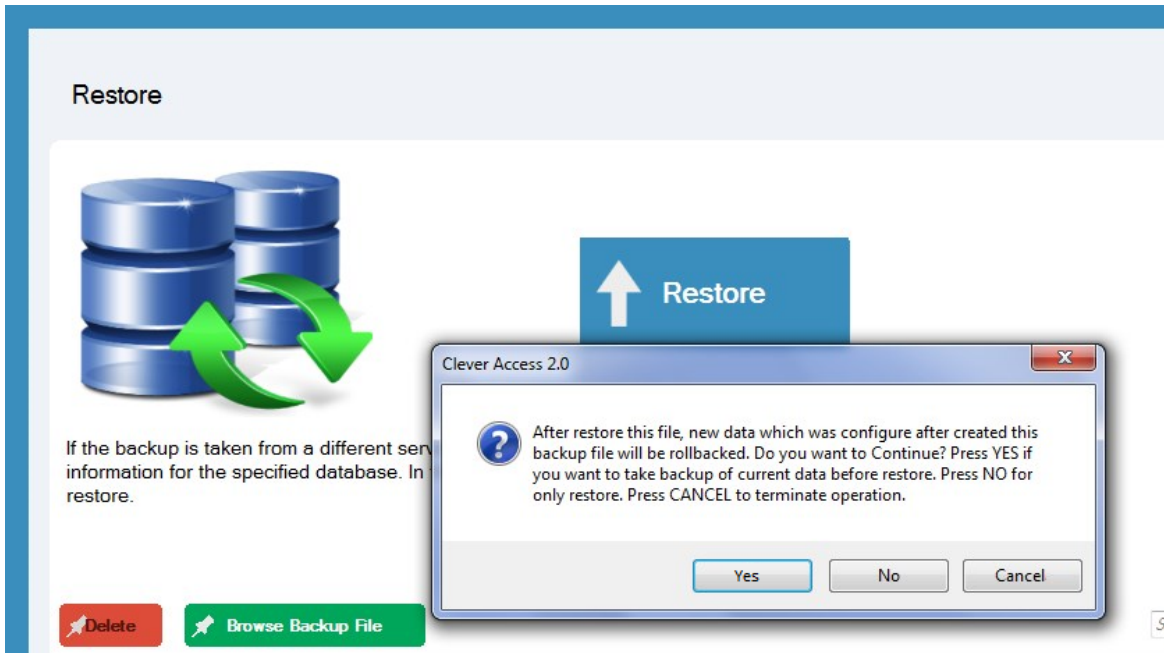

3.- A window appears to search for the backup file that was generated earlier, once located, click on **“Open”**, the window closes.

4.- Click on **"Restore"**

5.- A small window opens, alerting that, after restoring the file, the existing data will be lost, giving the option of making a backup (by clicking on "Yes"), otherwise (clicking on "No") for only restore.

6.- Later it indicates that the data was restored successfully

7.- Click "Yes" to restart the software.
