

- Network or Stand Alone Operation
- TCP/IP
- PC programming and monitoring via LAN / INTERNET
- Clock Function
- Anti-Passback
- Unlimited TCP/IP Controllers in One System
- Up to 54.000 Cards
- Interconnection with Fire Detection Systems, Alarm, etc.
- Can build Network with controllers in different cities / countries

Designed for TCP/IP Access Control applications, both for small and medium/large projects.

Capacity:	Up to 54.000 Standard Cards Register of more than 60.000 events
TCP/IP Controllers in Network:	Unlimited
Doors to Control:	2
Inputs for Readers:	2
Inputs for Magnetic Sensors:	2
Inputs for Exit Push Button:	2
Output for Magnetic Locks:	2
Network Socket:	RJ45
Types of Access:	Card Password Card+PW Double card Fist card Software Fire alarm Release button Door timer Proximity Card Proximity Card + Keyboard Password Fingerprint Reader Push Button or Presence Sensor Power ON (red)/Communication (green)
4 Types of Exit:	
Led Indicators:	
Power Supply:	12 VDC
Current:	Stand by: 50 mA / Working: 130 mA
Relay:	10A/120VAC - 7A/240VAC
Lock:	Mechanical/Magnetic
Operating Temperature:	-10 / +60° C
Operating Humidity:	0 / 95%
Weight:	200g
Dimintions:	210 x 125 x 22 mm
