## Installation of "Siera Management Software"

- 1. Copy the folder "Siera Management Software" to your C:/ path or D:/ path, please don't put it in the desktop.
- 2. Make sure you login your computer with Administrator role.

Right click "Command Prompt", and select "Run as administrator". Input "net user administrator /active:yes "

Note: There are two blank space here: net user administrator active: yes

Then restart your PC and login in your PC by "administrator" rule.

- 3. Turn off the firewall.
- 4. Run "srv\_install.bat", then restart your PC.
- 5. Access to the Service of your PC, and start "Apache Tomcat 6" and "watchdog" manually

 Reboot your PC, then access to "bin" folder, and run "cms.exe" Username: admin Password:123456

Then you can access to the management interface.

7. You can also login this management software on another PC. Just copy "cms.exe" and "libmysql.dll" to another PC, then login to the PC which installed management software:

			w11
